Projects

Apples to Oranges *Firestore | Chrome Extension | React*

- › Group project aimed at solving the hassles of sharing long web links in order to comparative shop.
- › Worked on the front end creating components and design of the site and extension.

Health Connect *Mongoose | Node.JS | Express*

- › Group project using wireframes and mockups from our UX team to build an app that connects school nurses to doctors.
- › Worked on creating the schemas and routes in the backend for the nurses to create and update reports, while guardians had access to the child's profile.

Word of Mouth *Mongoose | Express | React | Node.JS | Redux*

- › Personal passion project focused on the D.I.Y. art and music community. The app provides a clean user interface in order for people to find events around the Austin area.
