Projects

Apples to Oranges   *Firebase | Chrome Extension | React*

› The company aims at solving the hassles of sharing long web links to comparative shop.

› Worked on the front end creating components and design of the site and chrome extension.

Health Connect   *Mongoose | Node.JS | Express*

› Project using wireframes and mockups from our UX team to build an app that connects school nurses to doctors.

› Worked on creating the schemas and routes in the backend for the nurses to create and update reports.

Word of Mouth   *React Native | Redux | Firebase*

› Personal passion project focused on the D.I.Y. art and music community.

› The app provides a clean user interface in order for people to find events around the Austin area.

~

Work Experience

Bazaarvoice | Technical Success Manager
